Annapurna SIL - Versions and Changes

Announcement list

If you would like stay informed of updates to Annapurna SIL and other SIL fonts, please subscribe to the SIL Font News Announcement List. For more information see About.

Our font announcements are also available through Twitter [@silfonts](https://twitter.com/silfonts).

Current versions

The latest version of the fonts is always available from the Annapurna SIL download page as a .zip archive for all major platforms.

This font package is also available in the SIL software repository for Ubuntu. Users can subscribe to this software repository and get current versions and updates automatically.

Annapurna SIL is also available through the TypeTuner Web service, which allows you to choose among the smart font features and download a font with those features preset. This enables them to work in many applications that do not make use of Graphite or OpenType Stylistic Sets. TypeTuner Web currently uses version 5 fonts, however we will be working to update it to use the newest version 6 fonts soon.

Previous versions

Previous versions remain available from our Previous Versions archive.

Change history

A detailed list of changes for each version of the fonts is on the Version history page.
